

# SOFTWARE DEVELOPER JUNIOR

## ABOUT ME

I'm a software developer with a passion for computers, technological innovation and web development. I love building things. While complex technological problems are often intrinsically fun to solve, I'm most attracted to solving real-world customer problems with a business justification. I'm looking for a **junior software developer** role where I can take on a set of collaborative tasks that contribute to the success of the organization, while gaining experience with the latest development technologies and architectural principles. I'm a technical hobbyist at heart, but I do keep myself up to date as much as possible with the latest trends in software development. I am a strong believer in personal development and I keep myself up to date through courses on [Udemy](#).

### SKILLS SUMMARY

## EXPERIENCE

### UI/UX + Web Development

Neighbiz | Jul 2019 - Aug 2020

I was involved with the UX/UI design and web development of the web and mobile apps.

#### Roles & Responsibilities

- Prototyping with Flinto (both web and mobile app).
- UI/UX Design using **Sketch** and **Figma** and integrating the designs into Flinto for prototyping.
- Web development using **HTML5**, **CSS3** and **Bootstrap**.
- Web development using **Vue.js** and **Bootstrap Vue**.
- Minor IT support in the office (fixed minor issues on work pc's, networks and printers).
- Was involved in creative meetings and engaged in discussions involving social marketing, branding, exposure as well as technical meetings involving debugging and strategies in improving the applications overall.

### Web Design & Development

Freelance | Jul 2018 - Jul 2019

Designed Websites using **HTML5**, **CSS3**, **SASS/SCSS** and **Bootstrap** for clients while studying the "Web and Graphics" bundle from [The IT Academy](#).
